

## **3 reasons young adults need health coverage**

- 1.** Nobody plans to get sick or hurt, but bad things happen — even to healthy people. Having health coverage can help protect you from these unexpected costs, so you don't pay all costs yourself.
- 2.** With a Health Insurance Marketplace plan, you'll have complete coverage and access to essential health benefits, preventive services (including contraceptive services), and more. Some insurers may even pay the full cost of some types of doctor's visits before you have to pay anything.
- 3.** Plans in the Marketplace may be more affordable than you think. When you apply, you'll find out if you qualify for lower costs based on your household income or if you qualify for Medicaid. Last year, many people were able to select a plan with a premium of less than \$75 a month.

Marketplace Open Enrollment is  
November 1, 2016 – January 31, 2017.
